

Blue Prism Learning Edition FAQ

What are we announcing?

- With the v6.6 release, Blue Prism now offers users a free Learning Edition of Blue Prism. Learning Edition is easy to access, quick to deploy and comes with free access to training material and community support to accelerate the learning curve.

Who is it for?

- Anyone who wants to learn how to use Blue Prism, become an RPA developer, or produce a proof of concept for solving real business issues.

Great! Can you tell me more?

Blue Prism Learning Edition is a locally installed, limited version of Blue Prism that is free to use for 90 days. Learning Edition gives you the opportunity to learn how to automate business processes using your own Digital Worker and become part of the Blue Prism community. Begin your Robotic Process Automation (RPA) journey with Learning Edition and discover new opportunities by becoming a certified Blue Prism developer.

Learning Edition comes with free access to resources, tutorials, and training materials through [Blue Prism University](#) including an educational program with online learning and certifications to upskill RPA end-users and developers. Users also get free access to [Blue Prism Community](#) & forums for support. Learning Edition is simple to install and configure with our in-product, step-by-step guide.

What are the features?

- Free license for 90 days
- Designed for the business user with no programming skills required
- Self-managed and hosted with self-service wizard like installer for fast and easy installation and setup
- One (1) digital worker
- Up to five (5) processes
- Access to training material through [Blue Prism University](#)
- True drag-and-drop process studio for creating and managing process flows
- Reusable process objects
- Changes permeate the environment
- Veracode Level Continuous security
- Drop-in AI with the Digital Exchange
- Full audit trails with nonrepudiation
- Access control
- Knowledge base and Community support
- Same language support as Enterprise Edition: Full Japanese and Simplified Chinese

What are the requirements?

- Internet connection to download and activate
- Administration access to install and run Blue Prism
