

Timeout when trying to get 138.000 records

Timeout after 31 seconds

Works fine with 90.000 records.

From sql management studio I can retrieve all the 138.000 records after 50 seconds when execute the query.

New long opening connection

The image shows a flowchart and the corresponding code for a 'Long opening' activity. The flowchart starts with a 'Start' terminal, followed by a 'Long opening' activity box, and then a 'Raise Exception If Appropriate' box. A 'Success' output box is also shown. Below the flowchart is the 'Code Properties' window for the 'Long opening' activity.

```
graph TD; Start([Start]) --> LongOpening[Long opening]; LongOpening --> RaiseException[Raise Exception If Appropriate];
```

Code Properties

Name: Long opening

Description:

Inputs Outputs Code Parameters

```
1 Success = True
2 Message = ""
3 Dim queryString As String = "waitfor delay '00:00:00'"
4
5 If moConnection IsNot Nothing Then Return
6 Try
7     moConnection = New SqlConnection(ConnectionString)
8     moConnection.Open()
9     Dim myCommand As New SqlCommand(queryString,moConnection)
10    myCommand.CommandTimeout = 400
11    myCommand.CommandType = CommandType.Text
12    myCommand.ExecuteNonQuery()
13
14 Catch ex As Exception
15     Success = False
16     Message = ex.Message
17
18 End Try
19
```

Parameters

- In:ConnectionString
- Out:Success - Syst
- Out:Message - Syst

Commandtimeout = 400 seconds

Is not working in Blueprism

Get big collection with long opening
