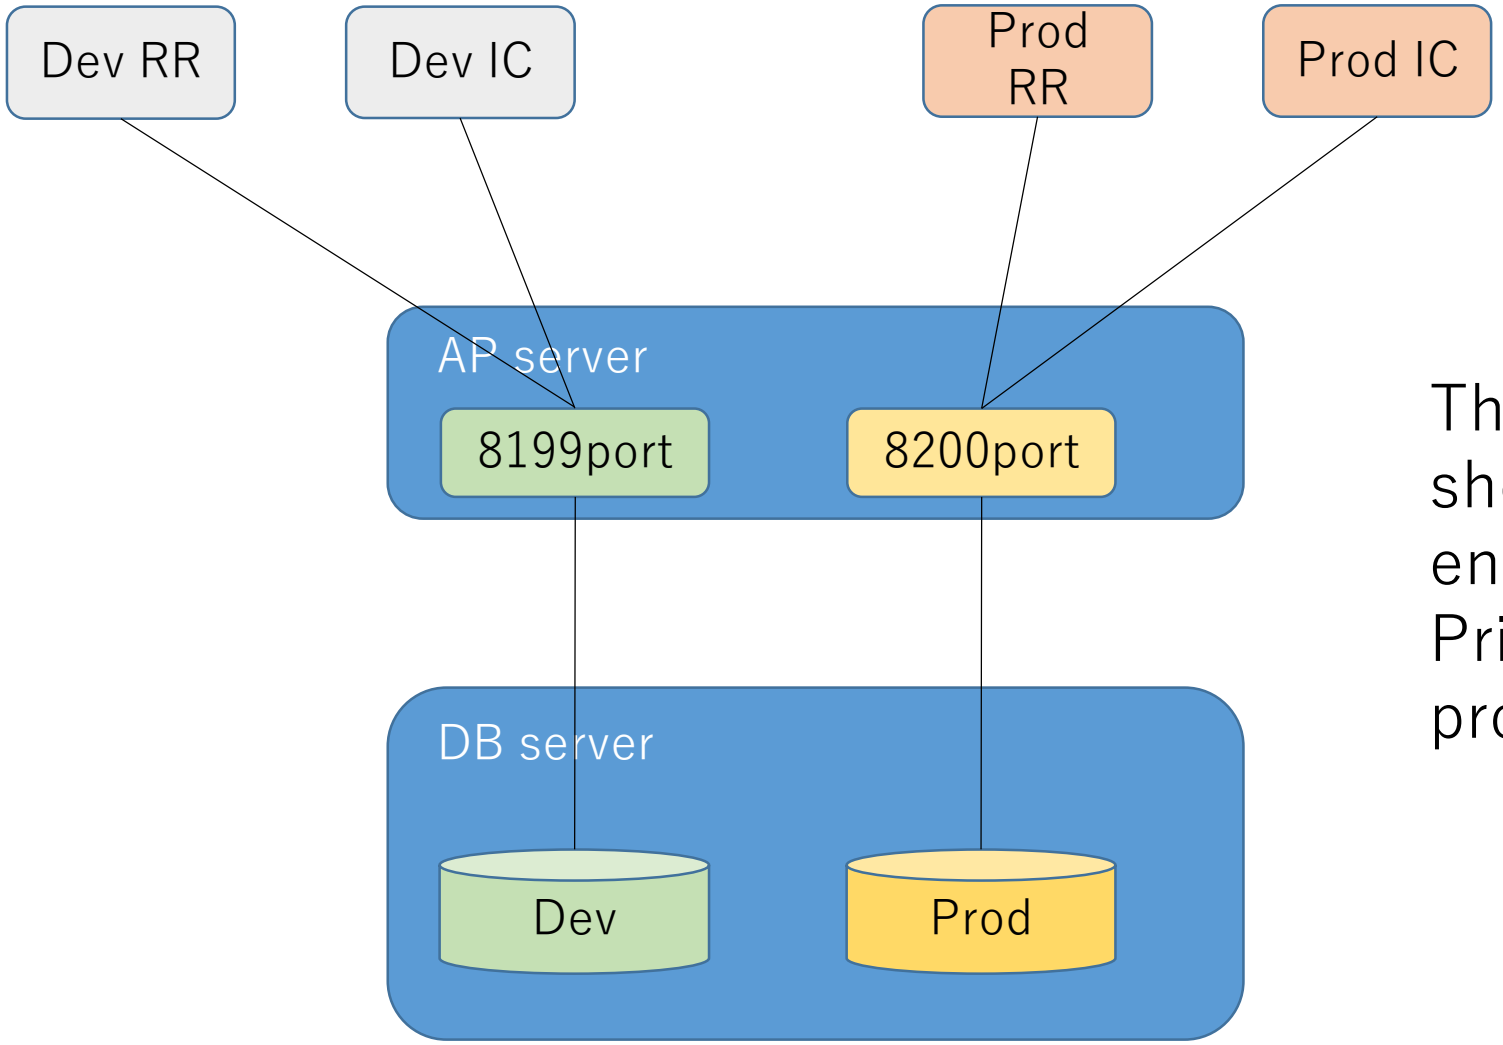
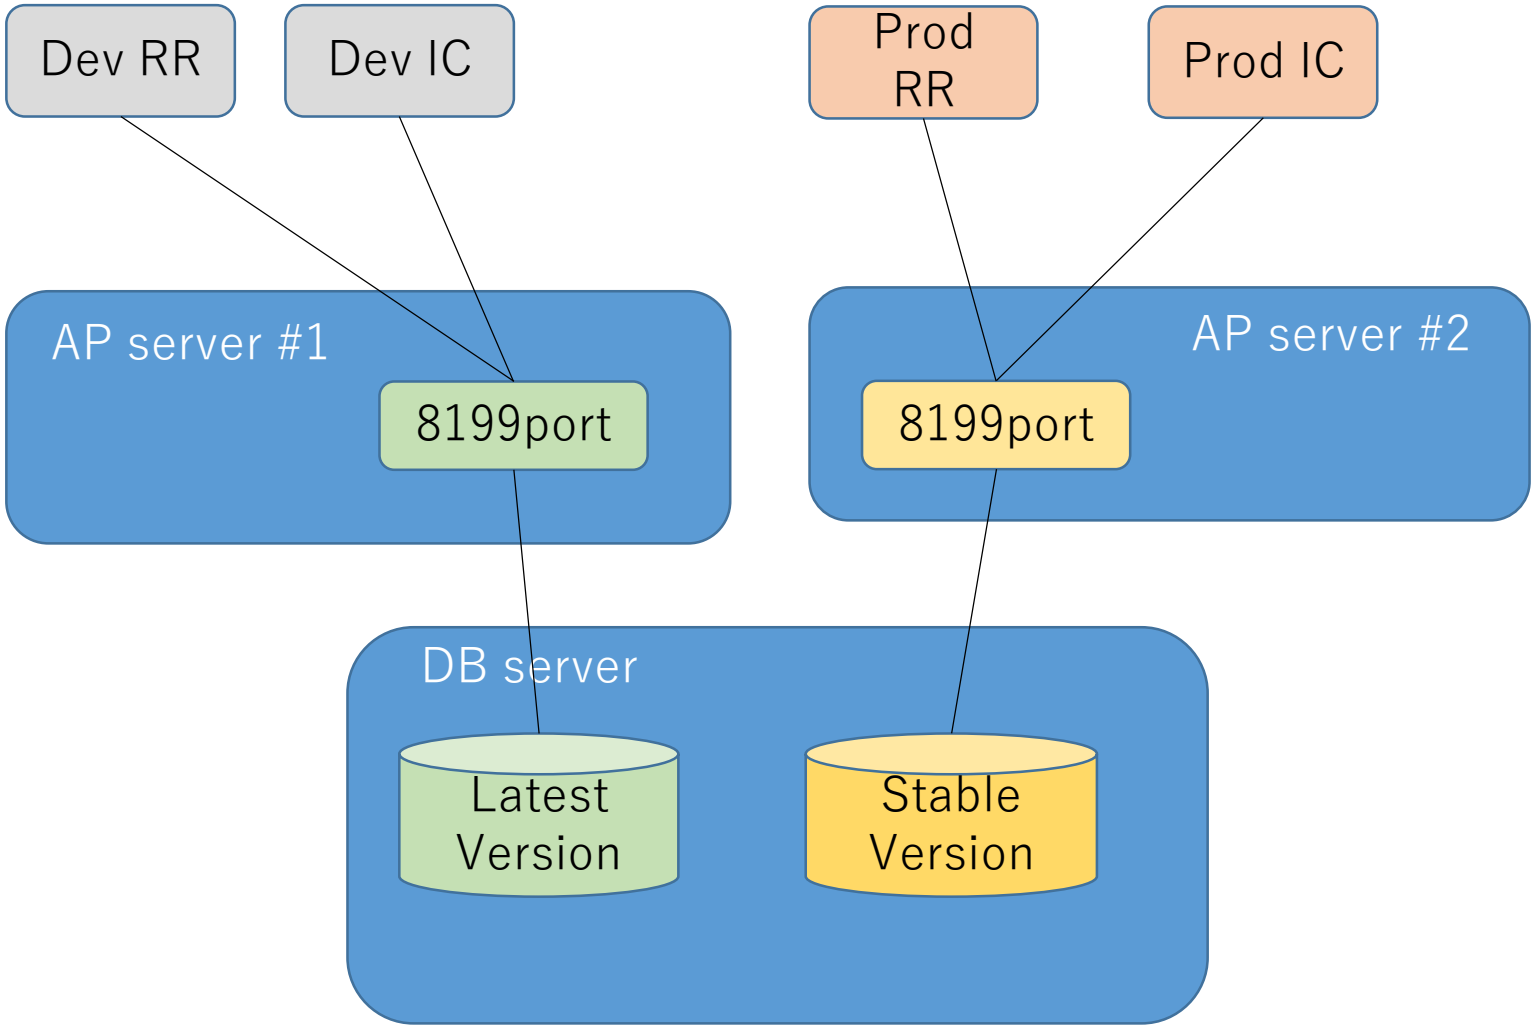
Currently



The current environment should make another test environment when Blue Prism software upgrade process.

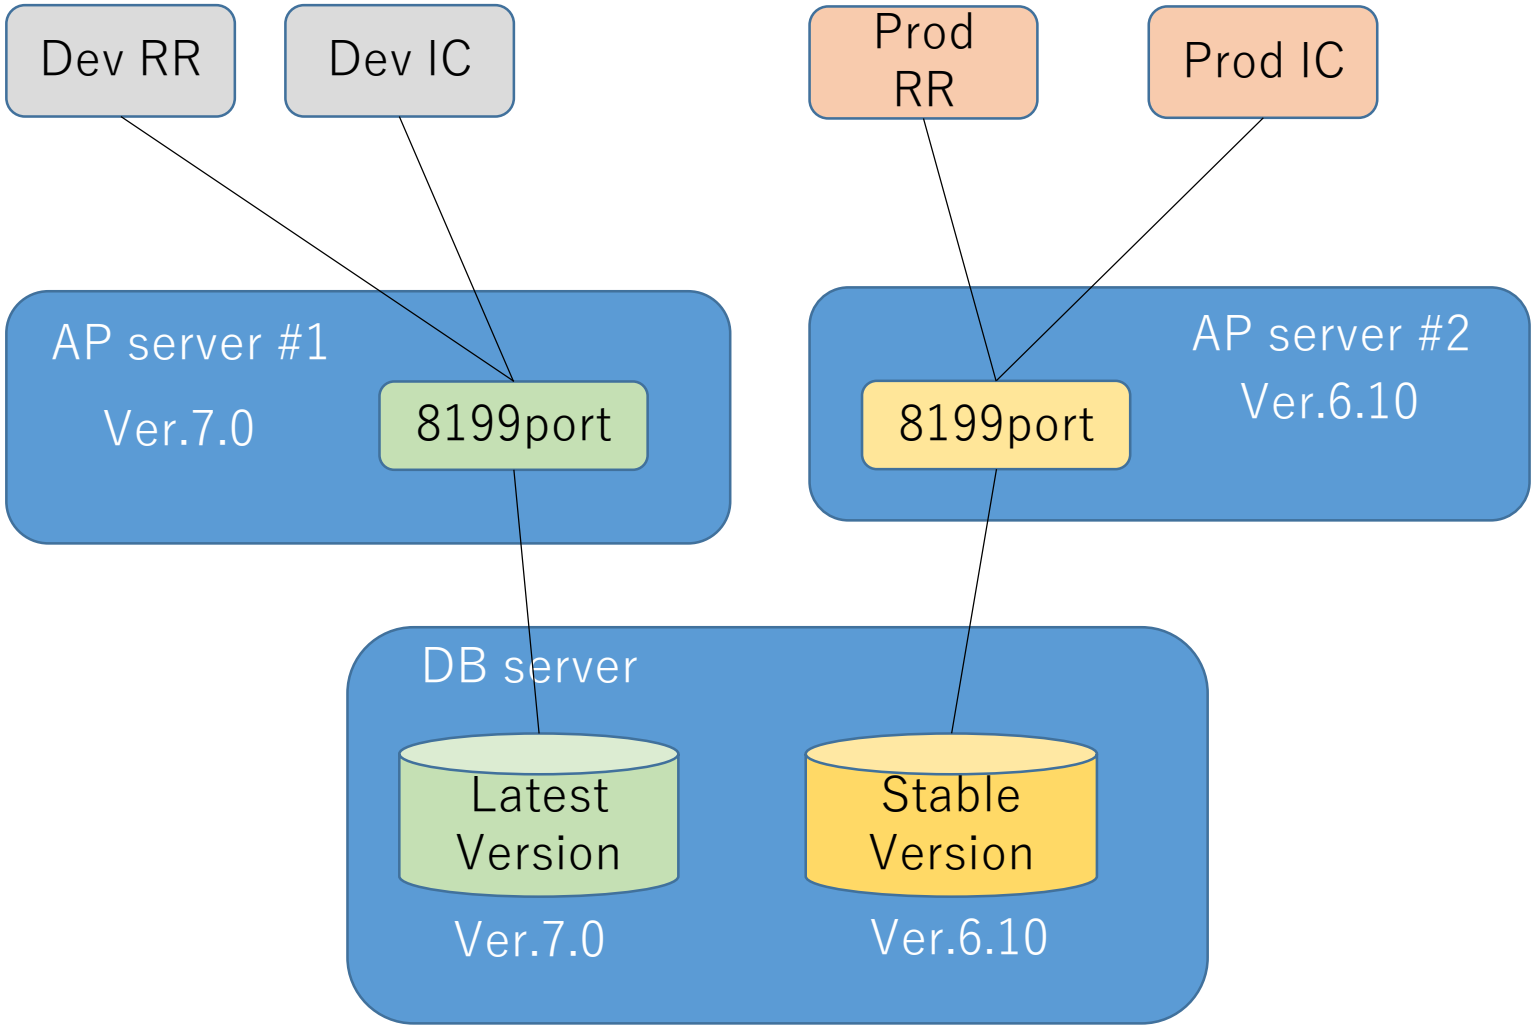
Prospect



We will provide latest and stable version environments. Each environments will be iterate to upgrade.

For Example

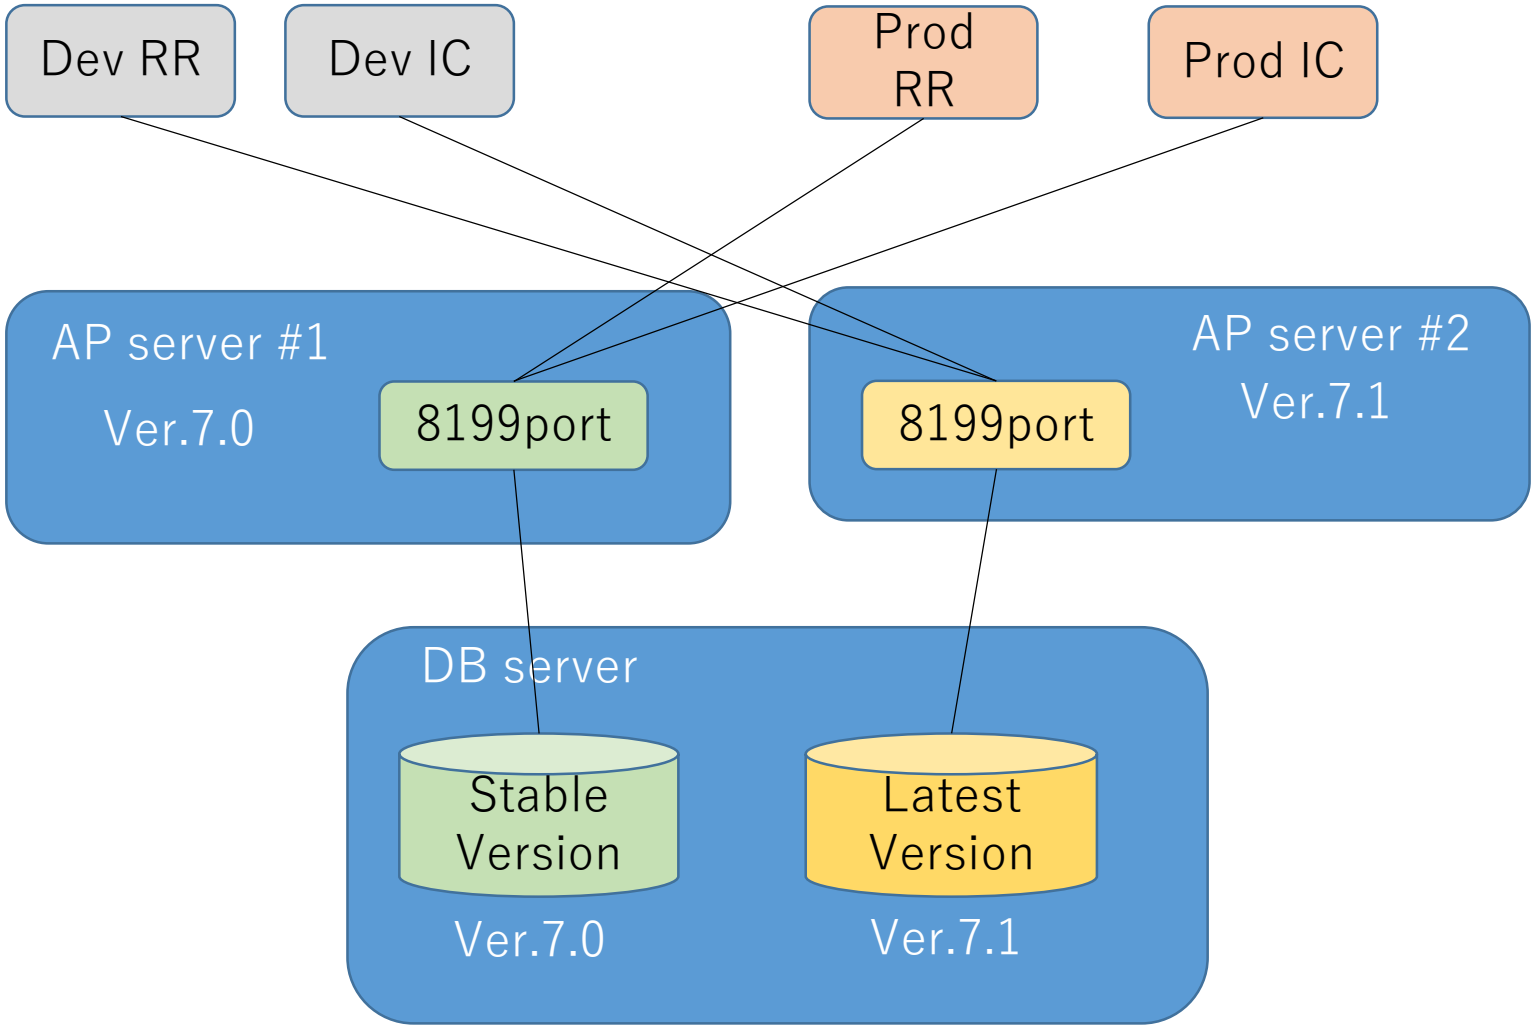
Exam A-1



AP#1 has 7.0 environment. Developers connect to the AP#1.

AP#2 has 6.10 environment. Operators connect to the AP#2 and provides any automation processes to departments.

Exam A-2



Developers complete any checks for the upgrade in the AP#1, then the AP#2 upgrade to ver.7.1, finally connect to the AP#2.(latest)

Operators change connection to the AP#1 (stable)
