

Can you get messages from SQL database Server using VBA code.?

From object:

Data – SQL Server

```
Private Function GetScalar(Of T)(ByVal sql As String, _  
    ByRef success As Boolean, ByRef msg As String) As T  
  
    ' Assume Success  
    success = True  
    msg = ""  
  
    Try  
        Using cmd As New SqlCommand()  
            cmd.Connection = moConnection  
            cmd.CommandText = SQL  
            cmd.Transaction = moTransaction  
            Return CType(cmd.ExecuteScalar(), T)  
        End Using  
    Catch ex As Exception  
        success = False  
        msg = ex.Message  
        Return Nothing  
    End Try  
  
End Function
```

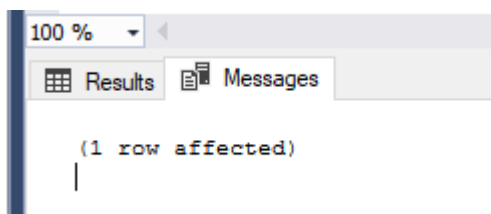

SQL statement:

You can retrieve the text from results

```
select * from BPACalendar
```

Results		Messages			
	id	name	description	publicholidaygroupid	workingweek
1	1	Working Week / No Holidays		NULL	62

But how can you retrieve Messages from SQL statement

To Blueprism.?
